DRONE THREATS REQUIRE DECISIVE ACTION.

"Unmanned systems pose both an urgent and enduring threat to U.S. personnel, facilities and assets overseas and increasingly in the U.S. homeland."
— *Maj. Gen. Pat Ryder, DoD spokesperson on new DoD counter-UAS strategy*

Responding to the UAS challenge demands integrated systems designed by experts who understand both the mission and the evolving threat. The rapid proliferation of dual-use UAS—across commercial, adversarial, and gray-zone domains—presents a persistent, asymmetric risk. As tactics like spoofing and firmware tampering advance, siloed detection tools fall short. Effective mitigation now requires agile, interoperable solutions that adapt as quickly as the threat does.

Edgesource combines embedded expertise with a modular suite of C-UAS technologies— delivering real-time decision advantage, not just detection.

BEYOND DETECTION: MISSION-READY C-UAS AdvantEDGE™

At Edgesource, counter-UAS isn't just a product—it's a mission capability.
We build systems that integrate, communicate, and act at speed.

Flexible & Modular Ecosystems
Simple sensors, plug-and-play integrations, and flexible configurations-- supporting mobile, fixed, and hybrid missions.
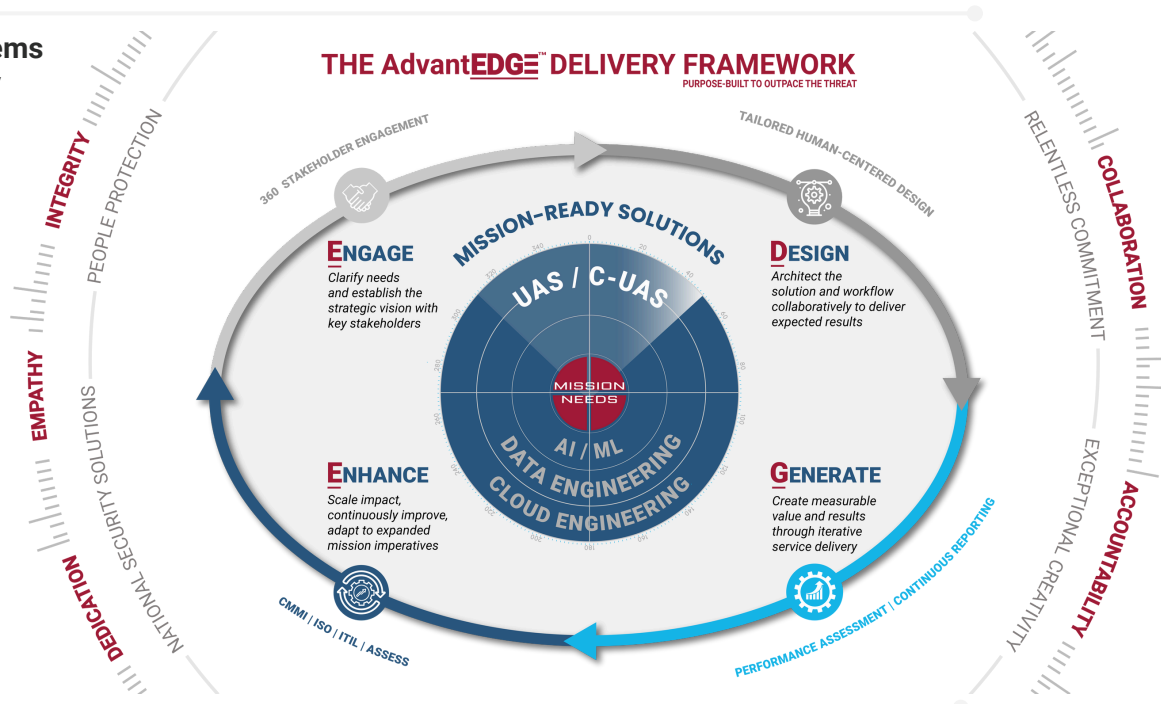

Rapid Detection-to- Interdiction Pipelines
Configurable real-time alerts, fused sensors, and automated deconfliction drive threat-to-action in seconds.

Tradecraft-engineered Situational Awareness
Field-tested solutions that consolidate widespread detection, tracking, and identification data--turning raw data into actionable intelligence.

Rugged, Field-Ready Kits
Portable systems designed for austere, low-bandwidth environments—supporting forward teams and host-nation partners.

THE AdvantEDGE™ DELIVERY FRAMEWORK
PURPOSE-BUILT TO OUTPACE THE THREAT

MISSION IMPACT CASE STUDY:

Edgesource's C-UAS solutions have been deployed in real-world civilian federal, DOD, and diplomatic protection missions where airspace security was of critical importance, resulting in:

- Filled critical detection and awareness gaps by integrating with existing infrastructure and field operations.
- Enabled frontline operators to respond in real time, with actionable alerts and *cross-team coordination*.
- Provided 24/7 expertise and guidance, becoming the go-to team, whose knowledge helps operators and defenders make fast, effective adjustments were needed.

YOUR RAPID START PARTNER: CLEARED. TRUSTED. READY.

Edgesource brings a procurement AdvantEDGE to C-UAS with:

▶ **Acquisition-Ready Offerings:** Awardable as small business prime on OASIS+, GSA MAS, and Navy SeaPort NxG.

▶ **Surge-Ready Capability:** AdvantEDGE is designed to scale fast. We flex with mission tempo—delivering surge capacity and cleared talent when operations demand it.

▶ **Mission Tested, Client Trusted:** Proven delivery on classified work—with pre-cleared teams, low-friction onboarding, and results and references that speak for themselves.

" AdvantEDGE DELIVERY IS... THE ADVANTAGE.

Edgesource applies proven AdvantEDGE capabilities—*from real-time alerting to field-integrated support*—to secure the airspace when and where it matters most.

The Result: Faster alerts. Coordinated defense. Trusted support. No delays. Just UAS detection that adapts with the threat.

"Their team didn't just integrate systems— they stayed side-by-side with our operators, adjusting in real-time and keeping us one step ahead."

— Classified Federal Protection Lead, C-UAS Mission

"We do more than sensors— we solve mission-critical gaps others overlook.
Tailored software products are designed and developed with our own operational cUAS expertise in mind. They fill little-known— but critical—gaps, giving global users and operators a decisive edge. Our reputation is built not on transactions, but on mission outcomes.
Whatever, wherever, and whenever your team needs mission-critical support, Edgesource stands ready to deliver."

— Dan Flack, Edgesource C-UAS Solution Advisor
