

MISSION ADVANTAGE STARTS WITH INSIGHT.

By 2025, up to 90% of data will be unstructured and nearly all of it unused for decision-making.
 (Cloudera)

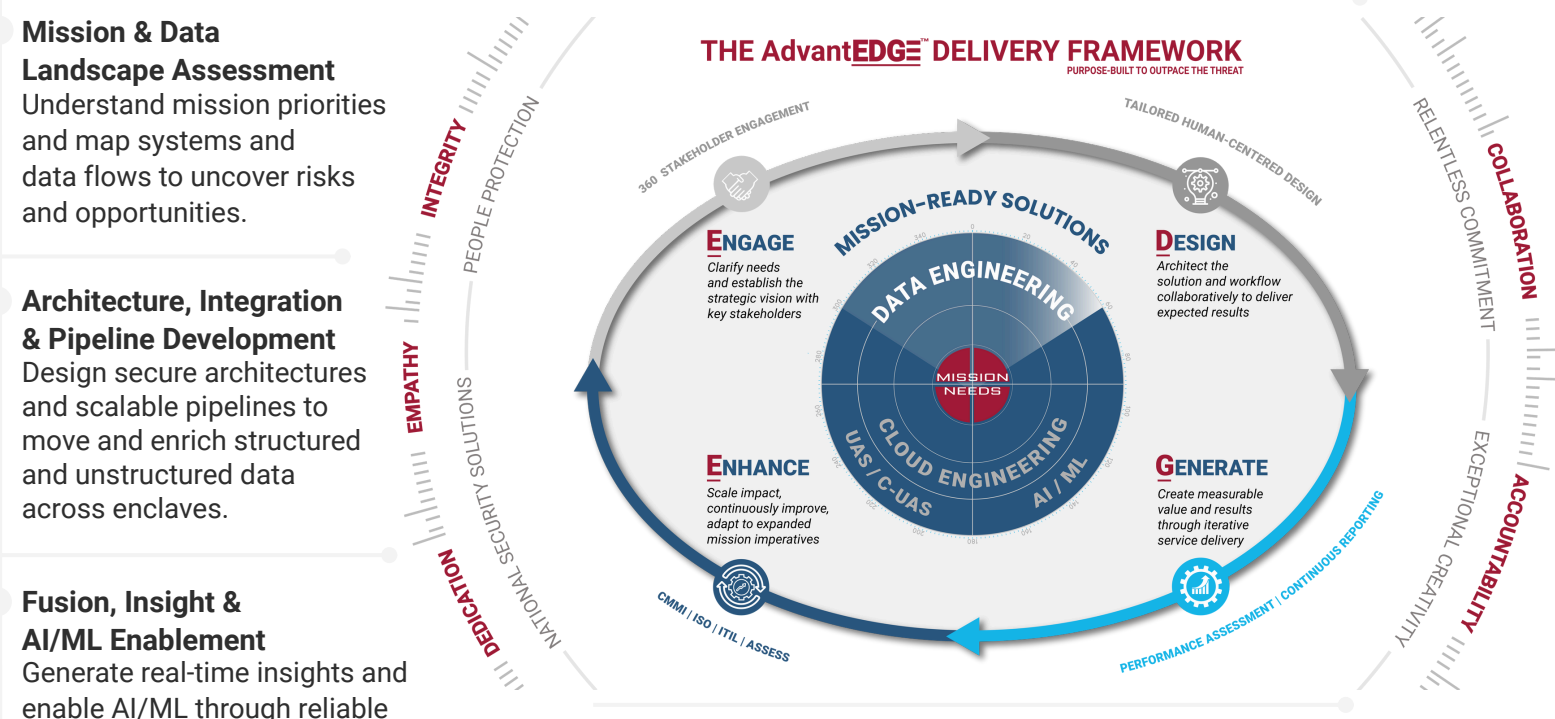

Missions suffer when data is fragmented, delayed, or disconnected from the point of decision.

- Fragmented data silos create dangerous blind spots.
- Manual prep and brittle pipelines routinely break, causing undue expense and downtime.
- Even advanced AI/ML depends on reliable, well-prepared data.
- Off-the-shelf ETL tools will fail in secure, classified environments without expert integration.

Edgesource overcomes these barriers with proven cleared experts and proven data engineering—delivering secure, mission-aligned pipelines that move insight to decision-makers at speed.

DATA ENGINEERING THAT DELIVERS MISSION AdvantEDGE™

Data AdvantEDGE turns complexity into clarity—delivering trusted insight, not just information.

Mission & Data Landscape Assessment
 Understand mission priorities and map systems and data flows to uncover risks and opportunities.

Architecture, Integration & Pipeline Development
 Design secure architectures and scalable pipelines to move and enrich structured and unstructured data across enclaves.

Fusion, Insight & AI/ML Enablement
 Generate real-time insights and enable AI/ML through reliable data foundations and embedded mission logic.

Data Lineage, Quality & Compliance
 Ensure defensible, trusted pipelines through auditing, traceability, validation, and security controls.

Performance Optimization & Lifecycle Monitoring
 Continuously adapt workflows and tune performance to meet evolving mission demands.

The Edgesource Data AdvantEDGE delivers—
 secure, reliable pipelines that help
 teams move faster, smarter, and safer.
 Together, we outpace the threat.

MISSION IMPACT CASE STUDY:

On this classified program where dirty data was delaying decisions, our team:

- Delivered critical insights *in days—not months*.
- Built UI/UX and backend systems that *integrated directly with critical, high-tempo mission centers*.
- Expanded mission coverage more than *700% in a year*—driven by proven performance and impact.

YOUR RAPID START PARTNER: CLEARED. TRUSTED. READY.

Edgesource brings a procurement AdvantEDGE to data engineering with:

- ▶ **Acquisition-Ready Offerings:** Awardable as small business prime on OASIS+, GSA MAS, and Navy SeaPort NxG.
- ▶ **Surge-Ready Capability:** AdvantEDGE is designed to scale fast. We flex with mission tempo—delivering surge capacity and cleared talent when operations demand it.
- ▶ **Mission Tested, Client Trusted:** Proven delivery on classified work—with pre-cleared teams, low-friction onboarding, and results and references that speak for themselves.

AdvantEDGE DELIVERY IS... THE ADVANTAGE.

Edgesource applies proven AdvantEDGE capabilities—from UI/UX design to cleared engineering talent—to shrink data delivery timelines, enabling real-time targeting through cross-domain pipelines directly integrated with mission centers.

The Result: Faster intel. Evolving tools. Continuous trust. Perpetual results.

“Edgesource didn’t just clean up our data—they cleared the path to real-time targeting. They listened, adapted, and delivered, evolving with the mission. They’re the go-team we trust to lead the next challenge.”

— Classified Program Lead, National Defense

“Our engineers deliver the data AdvantEDGE missions rely on. We architect secure, data pipelines that enable real-time decisions—transforming disparate inputs into mission-ready intelligence. From rapid fusion to high-volume processing, every solution is built for trust, speed, and scale. That’s why our pipelines don’t just move data—they move the mission forward.”

— Gene Loughran,
Edgesource Data Engineering
Solution Advisor
