

DOWDING PRODUCT INFORMATION

DOWDING USER INTERFACE

OPERATING PRINCIPLES

- Quickly and securely display & analyze sUAS activity
- Easily review all historical flight information for each drone
- Create real-time actionable intelligence reports with single pane common operating picture platform
- The secure, cloud-based interface provides unprecedented Find-Fix-Finish (F3) positioning for pilot & sUAS
- Dowding provides the correct level of information for all user types, from the intelligence analyst, to the strategic COCOM level

PRODUCT FEATURES & FUNCTIONS

- Seamlessly integrate with Windtalker™ and the Edgesource companion solutions
- Connect additional systems and sensors to bring a holistic air picture together for easy consumption, correlation, and rapid response
- Real-time notification of drone activity allows for user-defined zones of interest, threat warnings, and alerts via SMS or email
- Attribution data includes operator location, home point (take-off), and flight track data
- Can be deployed and used by end operators with minimal training in less than an hour
